DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 recites the limitation "of said linguistic ambiguity" in line 2.

There is insufficient antecedent basis for this limitation in the claim.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 17 and 18 provides for the use of a method, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 17 and 18 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Yu et al.

Yu et al teaches a keyboard arrangement including several keys (Fig. 3) for inputting characters by pressing the keys and wherein at least one key (Fig. 3) is used for entering at least two different characters, characterized in that it comprises means for detecting alternative sectional distributions of pressure (Fig. 3) on the at least one key and means for deducing the input character based on said distribution of pressure on the key. A keyboard (Fig. 3) arrangement in that it comprises means for deducing the input character also based on linguistic disambiguation.

A keyboard arrangement in that said means for detecting alternative sectional distributions of pressure comprise a movement sensitive detector (Fig. 4, segment B) attached to the key. A keyboard arrangement in that the key is triangular (Fig. 3) in shape or has three arms. A keyboard arrangement in that

the keys form two rows (Fig. 2) of keys and the keys of the two rows are interlaced. A keyboard arrangement in that the keys form a first row of keys and a second row of keys, the two rows of keys comprising three rows of characters marked on the keys (Fig. 2), wherein the upmost row of characters is marked to the first row of keys, the middle row of characters is marked alternately to the first and second row of keys and the lowest row of characters is marked to the second row of keys. Since 17 and 18 have no method steps they are included with the apparent claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marvin P. Crenshaw whose telephone number is (703) 308-0797. The examiner can normally be reached on Monday - Friday 7:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Hirshfield can be reached on (703) 305-6619. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7724 for After Final communications.
